

NOCODE CHATBOT

- Title: No Code Chatbot: AI-Powered Business Solutions
- Subtitle: Creating Chatbots Without Code

Presented by
GOKULRAMM S
JAISRINIVASAN J

PROBLEM STATEMENT

- **Main Problem:** Small business owners lack technical skills to build efficient AI chatbots for customer engagement, appointment booking, and FAQ automation.
 - **Market Need:** Increasing demand for accessible, no-code tools that allow quick, cost-effective chatbot deployment.
- 
- 

SOLUTION OVERVIEW

- **Project Name:** No Code Chatbot Platform
- **Solution Description:** Enables businesses to create, test, and deploy custom chatbots with no coding knowledge. Supports multiple AI models and customization options.
- **Key Features:**
 - File-Based, Form-Based, and Flow-Based Chatbot Creation
 - User-Friendly Admin Panel with Insights

FILE-BASED AI CHATBOT

Purpose: Ideal for businesses with large datasets (e.g., customer service logs, product information) needing AI-driven responses.

How It Works:

- **Upload Dataset:** Users upload their dataset containing business data.
- **Automatic Training:** System automatically processes and trains on the dataset.
- **AI Model Selection:** Users choose from [OpenAI](#), [Gemini](#), [Llama 3.1](#), or [Claude](#) based on the model's suitability for their needs.

FILE-BASED CHATBOT

File Based bot4 - Multi-AI Chatbot Interaction

Ask a question...

Ask

Meta LLaMA 3.1

Meta LLaMA response for: hii using the dataset.

Select Meta

OpenAI GPT

Error in OpenAI response: You didn't provide an API key. You need to provide your API key in an Authorization header using Bearer auth (i.e. Authorization: Bearer YOUR_KEY), or as the password field (with blank username) if you're accessing the API from your browser and are prompted for a username and password. You can obtain an API key from <https://platform.openai.com/account/api-keys>.

Select OpenAI

Gemini

Gemini response for: hii using the dataset.

Select Gemini

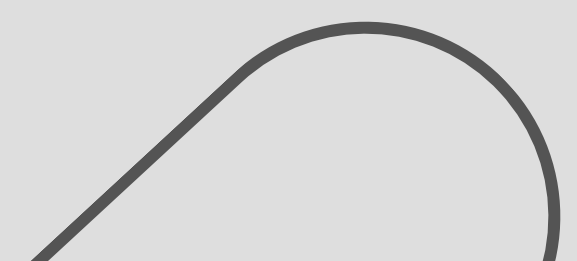

Claude

Claude response for: hii using the dataset.

Select Claude

FORM-BASED CHATBOT

- **Purpose:** Best suited for creating FAQ-style bots to answer common questions and provide quick information.
 - **How It Works:**
 - **Q&A Fields:** Business owners enter questions and corresponding answers.
 - **Data Training:** System processes this information to create an FAQ chatbot.
 - **Instant Chatbot Generation:** Bot is ready for deployment after data input.
- 

FORM-BASED CHATBOT

Create Form-Based Chatbot

Chatbot Name

Form Based bot1

Add Question

Create Chatbot

FLOW-BASED CHATBOT

- **Purpose:** Suitable for guided, structured conversations like appointment booking, lead qualification, or surveys.
 - **How It Works:**
 - **Question Flow Creation:** Users set up a sequence of questions.
 - **Options for Responses:** Options can be added for multiple-choice answers or guided responses.
 - **Deploy and Test:** Test and publish the flow-based chatbot on the website.
- 
- 

FLOW-BASED CHATBOT

TECHNICAL STACK

- **Backend: Django**
- **Frontend: HTML/CSS**
- **Database: MySQL, MongoDB**
- **AI Models: OpenAI, Gemini, Llama 3.1, Claude**

IMPACT AND BENEFITS

For Businesses:

Increases customer engagement.

Saves time and reduces customer service costs.

For End-Users:

- Easy, interactive customer support and booking.
 - Free of Cost
- 
- 

OUR PROJECTS

The Project That We Are Worked and Developed

FaceAttendance
System

The Embedded System That Can Track Student Attendance Based On Thier Face Pattern.

Student Outing
Pass System

The Webapplication That Manage The Student Outpass Digitly And Reduce The Complexity Behind The Permission and Approval.

Anti Crash Train
System

The IoT Based System That Can Track Specific Trains Location And Avoide The Crashing And Reduce The Risk Factor.

E-Commerce

The E-Commerce Platform That CanProvide Connection To Formers with Intractive Way And Provide Tamil Interface.
